

BENNY FANG

Results-driven Senior Software Developer and CTO with 8+ years of comprehensive experience in full-stack development, AI integration, and technical leadership. Proven track record of architecting and deploying scalable enterprise solutions serving 10,000+ users across education and workforce management sectors. Expert in leading cross-functional teams through Agile methodologies while delivering innovative AI-powered platforms. Combines strong technical expertise in modern frameworks (React Native, Vue.js, Spring Boot) with strategic business acumen from Engineering Business background. Specialized in transforming complex business requirements into robust, cloud-based solutions with measurable impact on operational efficiency and user engagement.

HOBBIES

Music (piano – 13 yrs, alto sax – 4 yrs)

Tech gadgets

Japanese culture

Culinary arts

LANGUAGE

English (Native)

Chinese (Native)

Japanese (conversation level)

EDUCATION

British Columbia Institute of Technology (BCIT)

Web Development Courses

July 2017 - December 2019

University of Toronto

Bachelor of Applied Science and Engineering

Major in Computer Engineering | Minor in Engineering Business

September 2011 – June 2016

PROFESSIONAL EXPERIENCES

Lumina Education Institute Inc.

Senior Software Developer / Chief Technology Officer (CTO)

January 2020 - Present

- Architected and deployed AI-powered educational platform serving 50+ rural schools and 10,000+ students across China, achieving 95% user satisfaction rate
- Developed intelligent AI chatbot system that reduced student support response time by 70% and increased learning path completion rates by 45%
- Led end-to-end development of "LuminAI" tablet application for Android with 15,000+ active installations:
- Built version 1.0 using Uniapp framework
- Engineered version 2.0 using React Native, improving app performance by 60% and reducing load times to under 2 seconds
- Designed scalable microservices architecture handling 500,000+ API requests daily with 99.8% uptime using cloud-based Spring Boot backend and Python microservices
- Implemented AI workflows using Dify framework with locally deployed Qwen 3.7 model and DeepSeek API, reducing AI inference costs by 40% compared to cloud-only solutions
- Built 3 responsive web platforms for educators using Vue.js framework, supporting 2,000+ teachers with course management and analytics tools
- Deployed and maintained services on Linux (Ubuntu 22.04) infrastructure, reducing deployment time by 80% through automated CI/CD pipelines via Tencent's bt.cn interface
- Led and mentored cross-functional team of 6 developers using Kanban methodology, delivering 12+ major features on schedule over 2-year period

- Implemented Agile development practices with daily scrum meetings, increasing sprint velocity by 35% and reducing bug backlog by 50%

GroupeX Solutions

Application Consultant

April 2017 – January 2020

- Developed custom workforce management solutions using proprietary Workforce Formula Language for 15+ enterprise clients with combined workforce of 100,000+ employees
- Successfully delivered time & attendance management systems for major industrial clients including SASOL, Madison Square Garden, Eversource, and Flynn Construction
- Reduced timesheet processing errors by 85% and cut payroll processing time by 40% through automated validation rules and custom workflows
- Configured 200+ complex system components including workforce interfaces, timesheets, data elements, and security protocols across multiple client environments
- Performed 1,000+ backend data operations and testing cycles using MySQL queries, maintaining 99.9% data accuracy for employee records
- Administered 20+ back-end servers via VPN and WFS Tenant Manager software, ensuring 24/7 system availability
- Provided Application Management Services (AMS) support, resolving 500+ tickets with 95% first-contact resolution rate and average response time under 4 hours
- Executed 50+ live server updates with zero downtime, supporting critical business operations across North America and Europe

City of Brampton

System Developer (COOP)

May 2014 – May 2015

- Completed Professional Experience Year (PEY) co-op program focusing on Microsoft technology stack
- Automated data retrieval processes by developing custom Visual Basic (VB) scripts for Excel
- Designed data visualization solutions by querying fire incident data from Microsoft SQL Server and creating categorized heat map presentations
- Inherited and successfully launched Application Inventory Depository project (ASP.NET/VB.Net), resolving 50+ bugs through backend SQL testing and optimization

- Designed and developed Transit Incident Tracking System to meet city requirements for accessible online incident management

SKILLS

Artificial Intelligence & Machine Learning

- AI Models: ChatGPT 5.6 Sol, Gemini 3.1 Pro, Claude 5 Fable, Qwen 3.7 Max, DeepSeek V4, etc (3 years)
- Languages: Python (1 year)
- Deployment Tools: Dify, Ollama, LangChain (1 year)
- AI-Assisted Development: Codex, Cursor, GitHub Copilot, TRAE, Claude Code (1 year)

Web Development

- Core Technologies: HTML, ASP, CSS, JavaScript, PHP (2 years)
- Frameworks & Libraries: Vue.js, React, AngularJS, jQuery, Bootstrap, Node.js, ASP.NET (5 years)
- **Lumina EdTech AI Website** - Responsive Vue.js 3 marketing site with component-based architecture | [Demo](#)

Mobile Application Development

- Cross-Platform: Uniapp (3 months), React Native + Expo (1 year)
- Native: Android Studio (1 year)

Programming Languages

- Object-Oriented: C, C++, Java, C# (Unity & ASP.NET) (1-2 years each)
- Proprietary: Workforce Formula Language (2.5 years)

Database Management

- MySQL, PostgreSQL, Java ODBC (1 year)

Additional Technical Competencies

- System Architecture: Cloud-based design, microservices architecture
- Operating Systems: Windows, Linux Ubuntu 22.4
- Version Control: Git, Subversion (Linux), Microsoft Team Foundation Server (TFS)
- Microsoft Ecosystem: Visual Studio, Dynamics CRM, SharePoint, Teams, Office Suite
